60-829 Poznan

Dear Sir or Madam,

I am writing to express my interest in the Software Engineer Internship in your Company. I learned about this appointment through the Internet and would like to introduce myself.

Currently I am a second year student of Computer Science at Poznań University of Technology. During my studies I have undoubtedly gained quite a lot of experience in different fields of Computer Science and I am eager to learn about new technologies and applications. With the beginning of the third term of my studies I joined student research group - PUTRocketLab, where I am developing low level software for embedded systems. I mostly program STM32 microcontrollers and 3d print models for our projects.

I believe that I am the right person for this job for a few reasons. To start with I am open minded and eager to learn. Even if I am not familiar with a programming language or some technology, I can quickly pick basics of it up and start developing a project as a part of learning process. Furthermore I am always trying to think critical and out of the box, which helps me find weak points in my work. I have always enjoyed simplicity and precision in computers which transfers to my hobbies like 3d printing, guitar playing and sailing.

I would love to meet you, introduce myself in person and discuss the internship opportunities and conditions. If you have any further questions, please let me know. You can reach me by phone number or email address provided at the top of the page.

Thank you in advance,
Stanisław Głowczewski
